

The React Developer Tools

Please don't skip!

In the next lecture, I introduce the React Developer Tools. The look of those changed a bit since the video was recorded, the features I show still exist and work in the same way.

The biggest difference is that by default, HTML elements do not show up in the new dev tools (only React components are shown), check this link to find out how to also re-add the

HTML elements: <https://reactjs.org/blog/2019/08/15/new-react-devtools.html#where-did-all-of-the-dom-elements-go>
